RE: TST Evaluation of Playtech's RNG

This Certification Letter pertains to Technical Systems Testing (TST)'s Second Pass Evaluation of the Playtech Limited (Playtech) Poker System Random Number Generator (RNG), for use within highly regulated jurisdictions worldwide.

TST's evaluation of Playtech's RNG was performed with the aim of identifying and detailing system weaknesses and potential issues of non-compliance with any applicable requirements from the following requirements:

- EGBA's **Software Provider Requirements**,
- Playtech's Technical Specifications, and
- Generally accepted industry standards for highly regulated jurisdictions worldwide.

TST has also previously evaluated a prior version of Playtech's RNG. Accordingly, the scope of work for the current evaluation of Playtech's RNG included (but was not necessarily limited to) the following elements:

- Submitted Documentation Review (Check for Changes),
- Compliance Report (CR) Responses Review (Check for Changes),
- Source Code Comparison (Check for Changes),
- RNG Testing (Test Changes), and
- Final Outcome Distribution Tests (for new Degrees of Freedom (DOFs) only).

TST successfully completed the Second Pass Evaluation of the Playtech RNG on 29 January 2009.

TST has verified, through mathematical and statistical analysis, that Playtech's RNG distributes numbers with fair distribution, lack of bias to particular outcomes and sufficient non-predictability. TST's Final Outcome Distribution Tests were performed using confidence intervals between 95% and 98%, which are documented intervals of confidence for such statistical analysis.

The evaluation has shown that Playtech's RNG produces a statistically acceptable source of random numbers for the following Playtech games / applications:

POKER PLATFORM: POKER GAMES		
Game Type	Game Name	DOFs
Poker	Holdem	51
	Omaha	51
	Omaha Hi-Lo	51
	5 Card Stud	51
	7 Card Stud	51
	Chinese 13 Card	51
	Big 2	51
	Fight the landlord (Dou Di Zhu)	2, 53

Subject to 1) the standard limitations of laboratory compliance testing, and 2) the limitations of the scope of work as listed above, it is TST's position that Playtech's RNG complies with the requirements listed above. Accordingly, TST recommends the approval of Playtech's RNG, for use within highly regulated jurisdictions worldwide.

TST's evaluation was performed using Playtech's RNG. TST's evaluation was based on specific information and materials (including, but not necessarily limited to, hardware, software, source code, documentation and general correspondence), as submitted to TST throughout the duration of the project. For verification purposes, TST has maintained a control version (or the means of verifying the control version) of all information and materials submitted during the evaluation.

Yours sincerely,

Ms. Yvonne Yuan
Laboratory Manager
TECHNICAL SYSTEMS TESTING (TST)
